WEST SIDE A. C. DECLINING.

Little Hope of Life for the Once Famous Organization.

The West Side Athletic Club is in a had way. Once the leading boxing organization of this city, and always prominent at any track meeting hereabout, it is lettering on its last legs, unless signs fail. And its last legs are decidedly infirm, too, and likely to give out and leave the once famous Club but a memory among athletes of this city.

An "Evening World" reporter, who visited the Club's quarters in search of news, found the gymnasium in darkness, save for the tiny speck of light which sputtered from the point of a cheap candle stuck in the neck of an empty bottle at one end of the long room. The dumbells, apparatus, pictures and other fittings had disappeared. One member, who is training for a coming fistic bout, stepped upon the scales, lighting a match to ascertain his weight.

"The gas meter is out of order," was the explanation vouchsafed, but that did not account for the missing fixtures and adornments. "Members' dues are missing would better account for the too apparent decline of the Club.

Perhaps a herculean effort might succeed in lifting the Club out of the slough, but among its members none can be found willing to undertake the almost hopeless task. ganization of this city, and always prom-

at Pasteur Institute.

WASHINGTON, Dec. 7.-In a report to Surgeon-General Wyman, Dr. J. J. Kinyoun, the Marine Hospital surgeon, who, at the invitation of Prof. Roux, investigated the methods of the Pasteur Institute. Paris, in the preparation of the new cure for diphtheria, says he spent a month at the institute, and has

the subject before the International Congress of Hygiene and Demography, neld at Budapest in September. The report gives in detail the steps necessary in the preparation of the serum antitoxine. They include: First, the preparation of the toxines of diphtheria: second, the immunization of animals; third, preservation of and conservation of the serum. The manner of producing immunity in an animal may, the report says, be performed in or by two ways—by injections of the toxines or by inoculations of the bacilli. The former method has been found to toxines or by inoculations of the bacilli. The former method has been found to be the best, and at present is the only

one in use.

In the experiments of Prof. Roux and Dr. Martin animals of all kinds were used, but now they use the horse, as it has been found to be the most satisfactory. Of the whole number of cases which came under Dr. Kinyoun's observation, about 4 per cent, died. The statistics show that there has been a gradual diminution of mortality since last May. The report says:

TO KEEP OUT ANARCHISTS.

Mr. Kelly passed a fairly good night, but is reported this morning as being yery weak. Owing to his extreme age his physician and friends fear he may not live until night. He is attended by Dr. McCreery, of Lexington avenue and Thirty-seventh street, who is by his bedside almost continually.

Mr. Kelly was born in Trillick, County Tyrone, Ireland, in 1868. His parents were industrious farmers, but on account of bard times Eugene Kelly came to this country at the age of twenty, landing in New York with only S in his pocket.

He began his business career as clerk in the dry-goods firm of Donnelly Bros. Here he rome rapidly until the dissolution of the firm. He next tried gold mining in '9, and afterwards started the San Francisco hanking-house of Donnohue, Kelly & Ralston.

He moved his business to New York during the late war, and lost large sums on Southern loans. Mr. Kelly was noted for quiet philanthropy, and gave large sums to charity.

His interat in Home Rule and his gift of \$20,000 to the Irish Parliamentary Fund are well known, as is his honorary appointment of 'Camerier de Cape et d'Epee' in the Pope's household.

At the age of eighty Mr. Kelly retired from active business. He is estimated as being worth from ten to fifteen million dollars.

Secretaries Gresham and Carlisle were specially anxious to secure legislation, in order to cut off the influx of dangerous characters. Senator Hill pushed the Anti-Anarchist bill through the Senate, but it met opposition from Messra. Warner, of New York; Goldzier, of Illinois, and others in the House. As it has already passed the Senate, favorable action by the House will conclude the legislation. Representative Warner, of New York, referring to the measure, said the necessity for it was vidently gone by. He said:

Mr. Warner's objection to the bill last session was that it did not define Anarchists, but gave Government officials a dangerous authority to call any one an Anarchist and then deport him.

NEW STYLES IN SHOES.

Bewildering Display for Ludies Wear at Cammeyer's. The style in shoes this season, especially in ladies' wear, is more marked than usual, and the display in the large establishments show a greater assortment than for some years. At A. J. Cammeyer's, Sixth avenue and Twen-tieth street, the largest refail shoe establishment in the world, the display is

tieth street, the largest refull shoe establishment in the world, the display is particularly attractive.

Among the ladies' wear the light colored tan with Bordeaux calf, has a particular run. They are heavier than those of last season, with a double sole, and can be worn in every kind of weather. The six-button shoe is still worn, especially the dress shoe with cloth top, patent-leather and Caledonia tip.

The Russian calf and Morocco driving shoe for ladies is greatly worn, while the Louis XV. is going out of date. Those that are worn are lower in the heel.

Cammeyer's display of ladies' and misses' slippers is both large and bewildering, and includes satina, sundals and Oxford ties in all evening shades, with bows, buckles and roscites to match. Over these are worn the carriage boot of cloth, velvet and mataliase, with the trimmings and linings.

The display in evening black and bronze beaded slippers and sandals is also extensive. The new feature is the Regent. It is made of patent-lesther with high tongue extending over the instep and buttons at the side. They are also duplicated in satin.

The display in the gentlemen's department is well worth seeing. The high its of the partment is well worth seeing.
